

INTRODUCING
BEEHIVE

Redefining Spaces
with Sustainable Innovation.

Quiet Corner

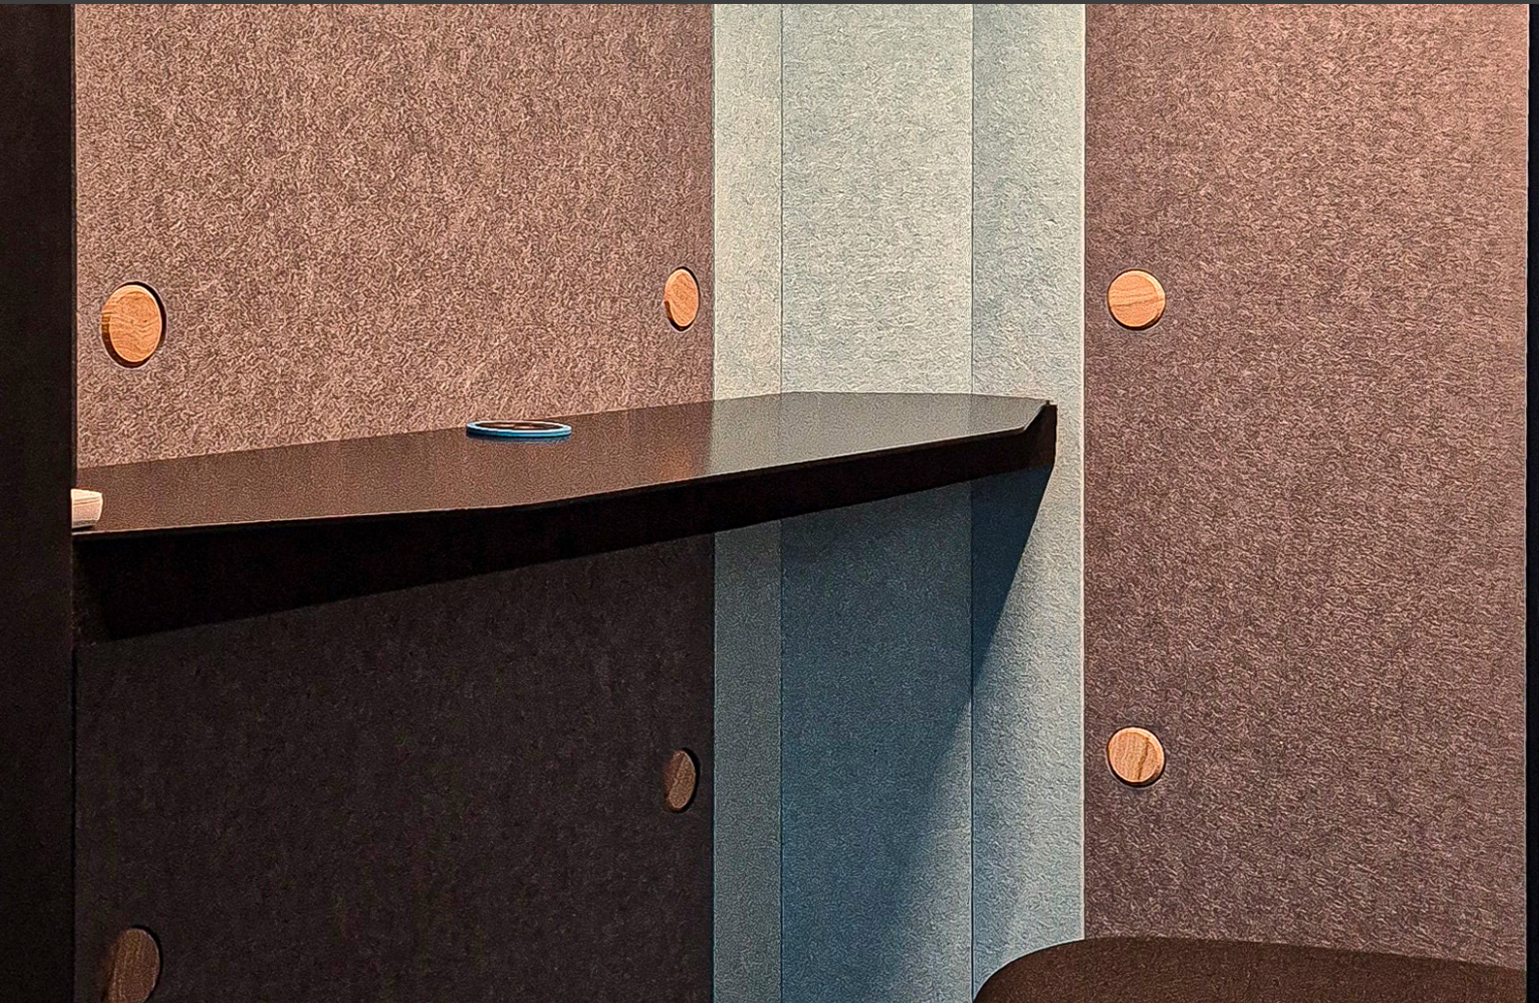

A simple, stylish and sustainable privacy solution designed for open office spaces.

Made entirely from eco-friendly PET felt and other materials, the **BEEHIVE** offers a quiet, private retreat in the midst of bustling environments.

This innovative booth reduces ambient echo and noise, providing a focused space for calls, video meetings, or concentrated work. Its modern, beehive-inspired design blends into any space layout.

Power and Charge

Our booth features discreetly integrated USB chargers or a power socket, built into a sleek, powder-coated metal table. Designed to meet modern needs, it ensures users stay effortlessly connected whenever required. Choose the option that best suits your needs.

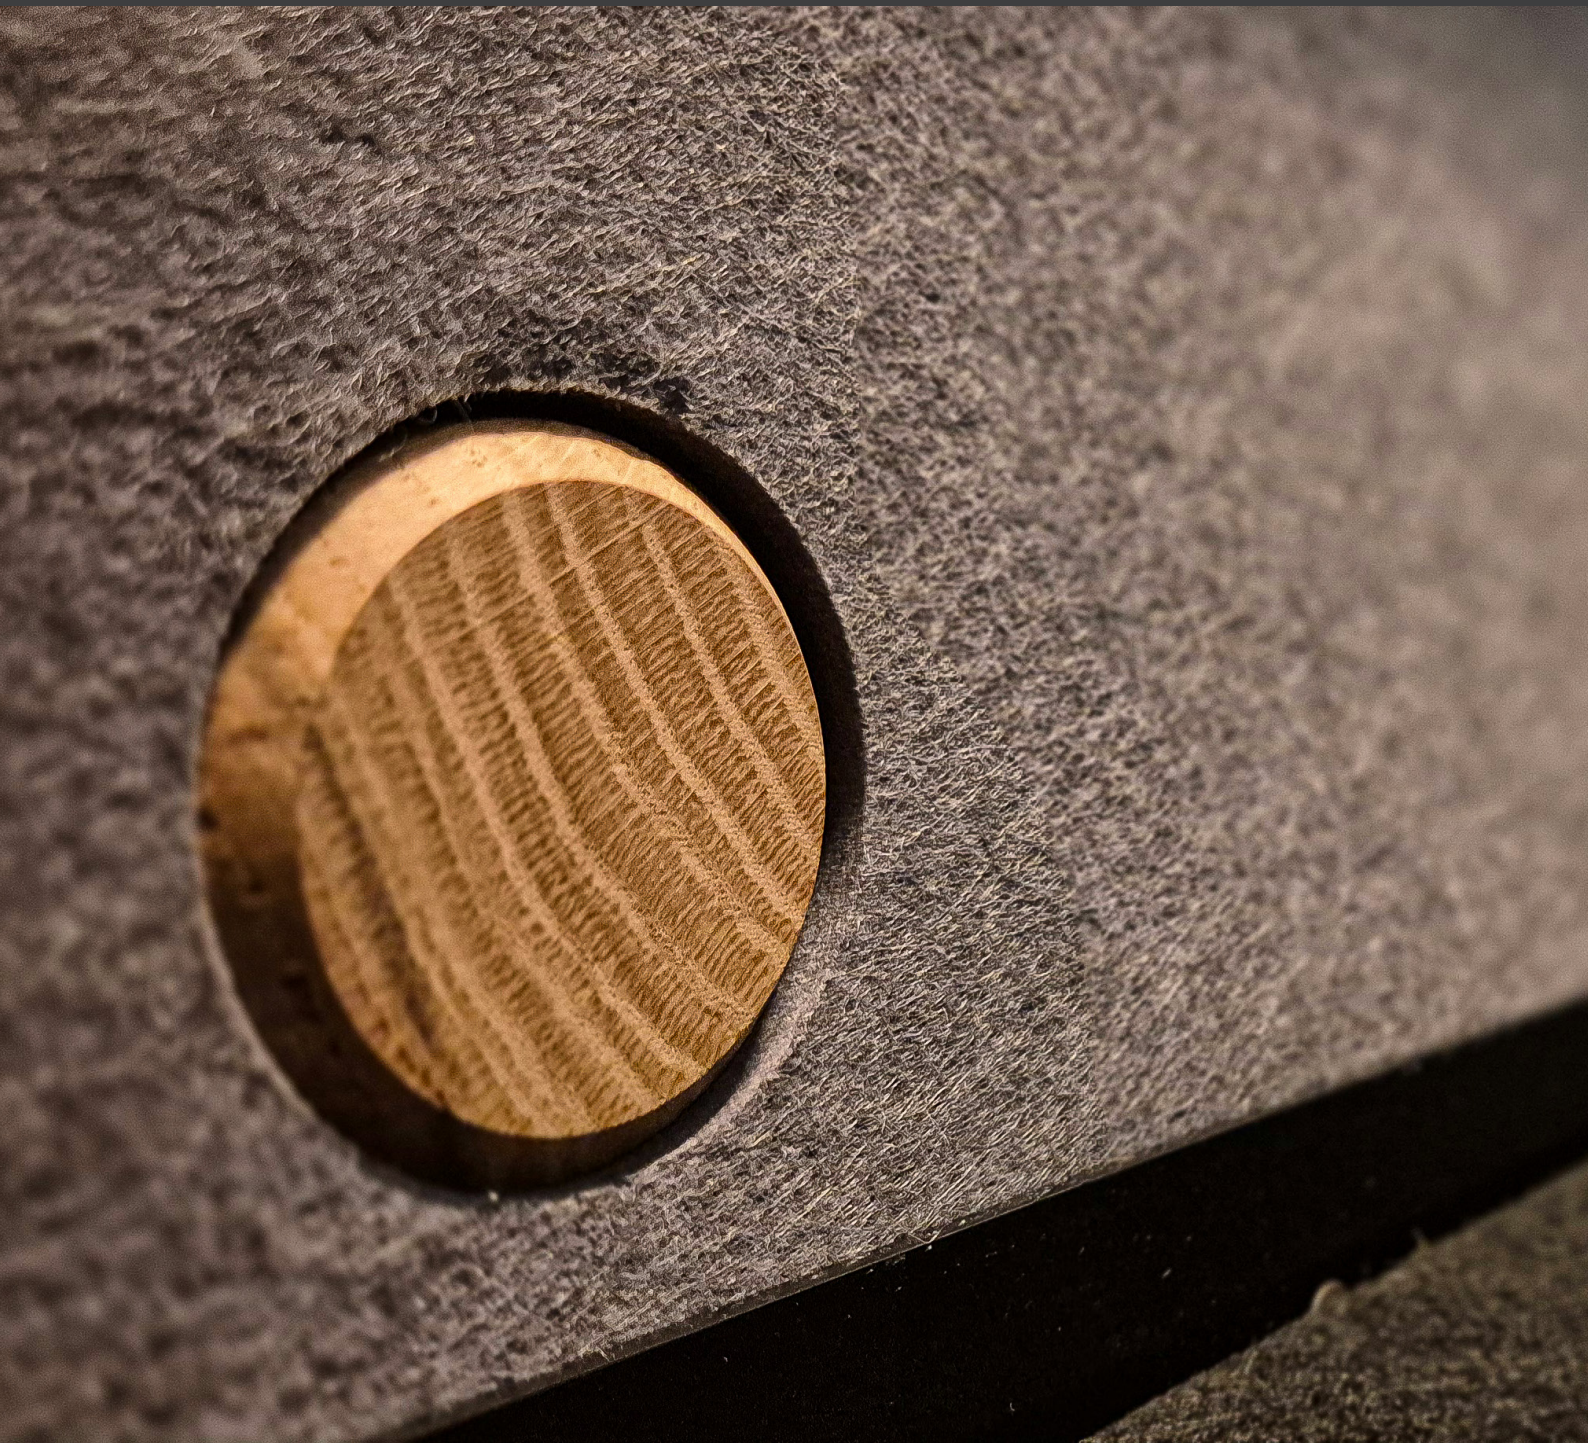

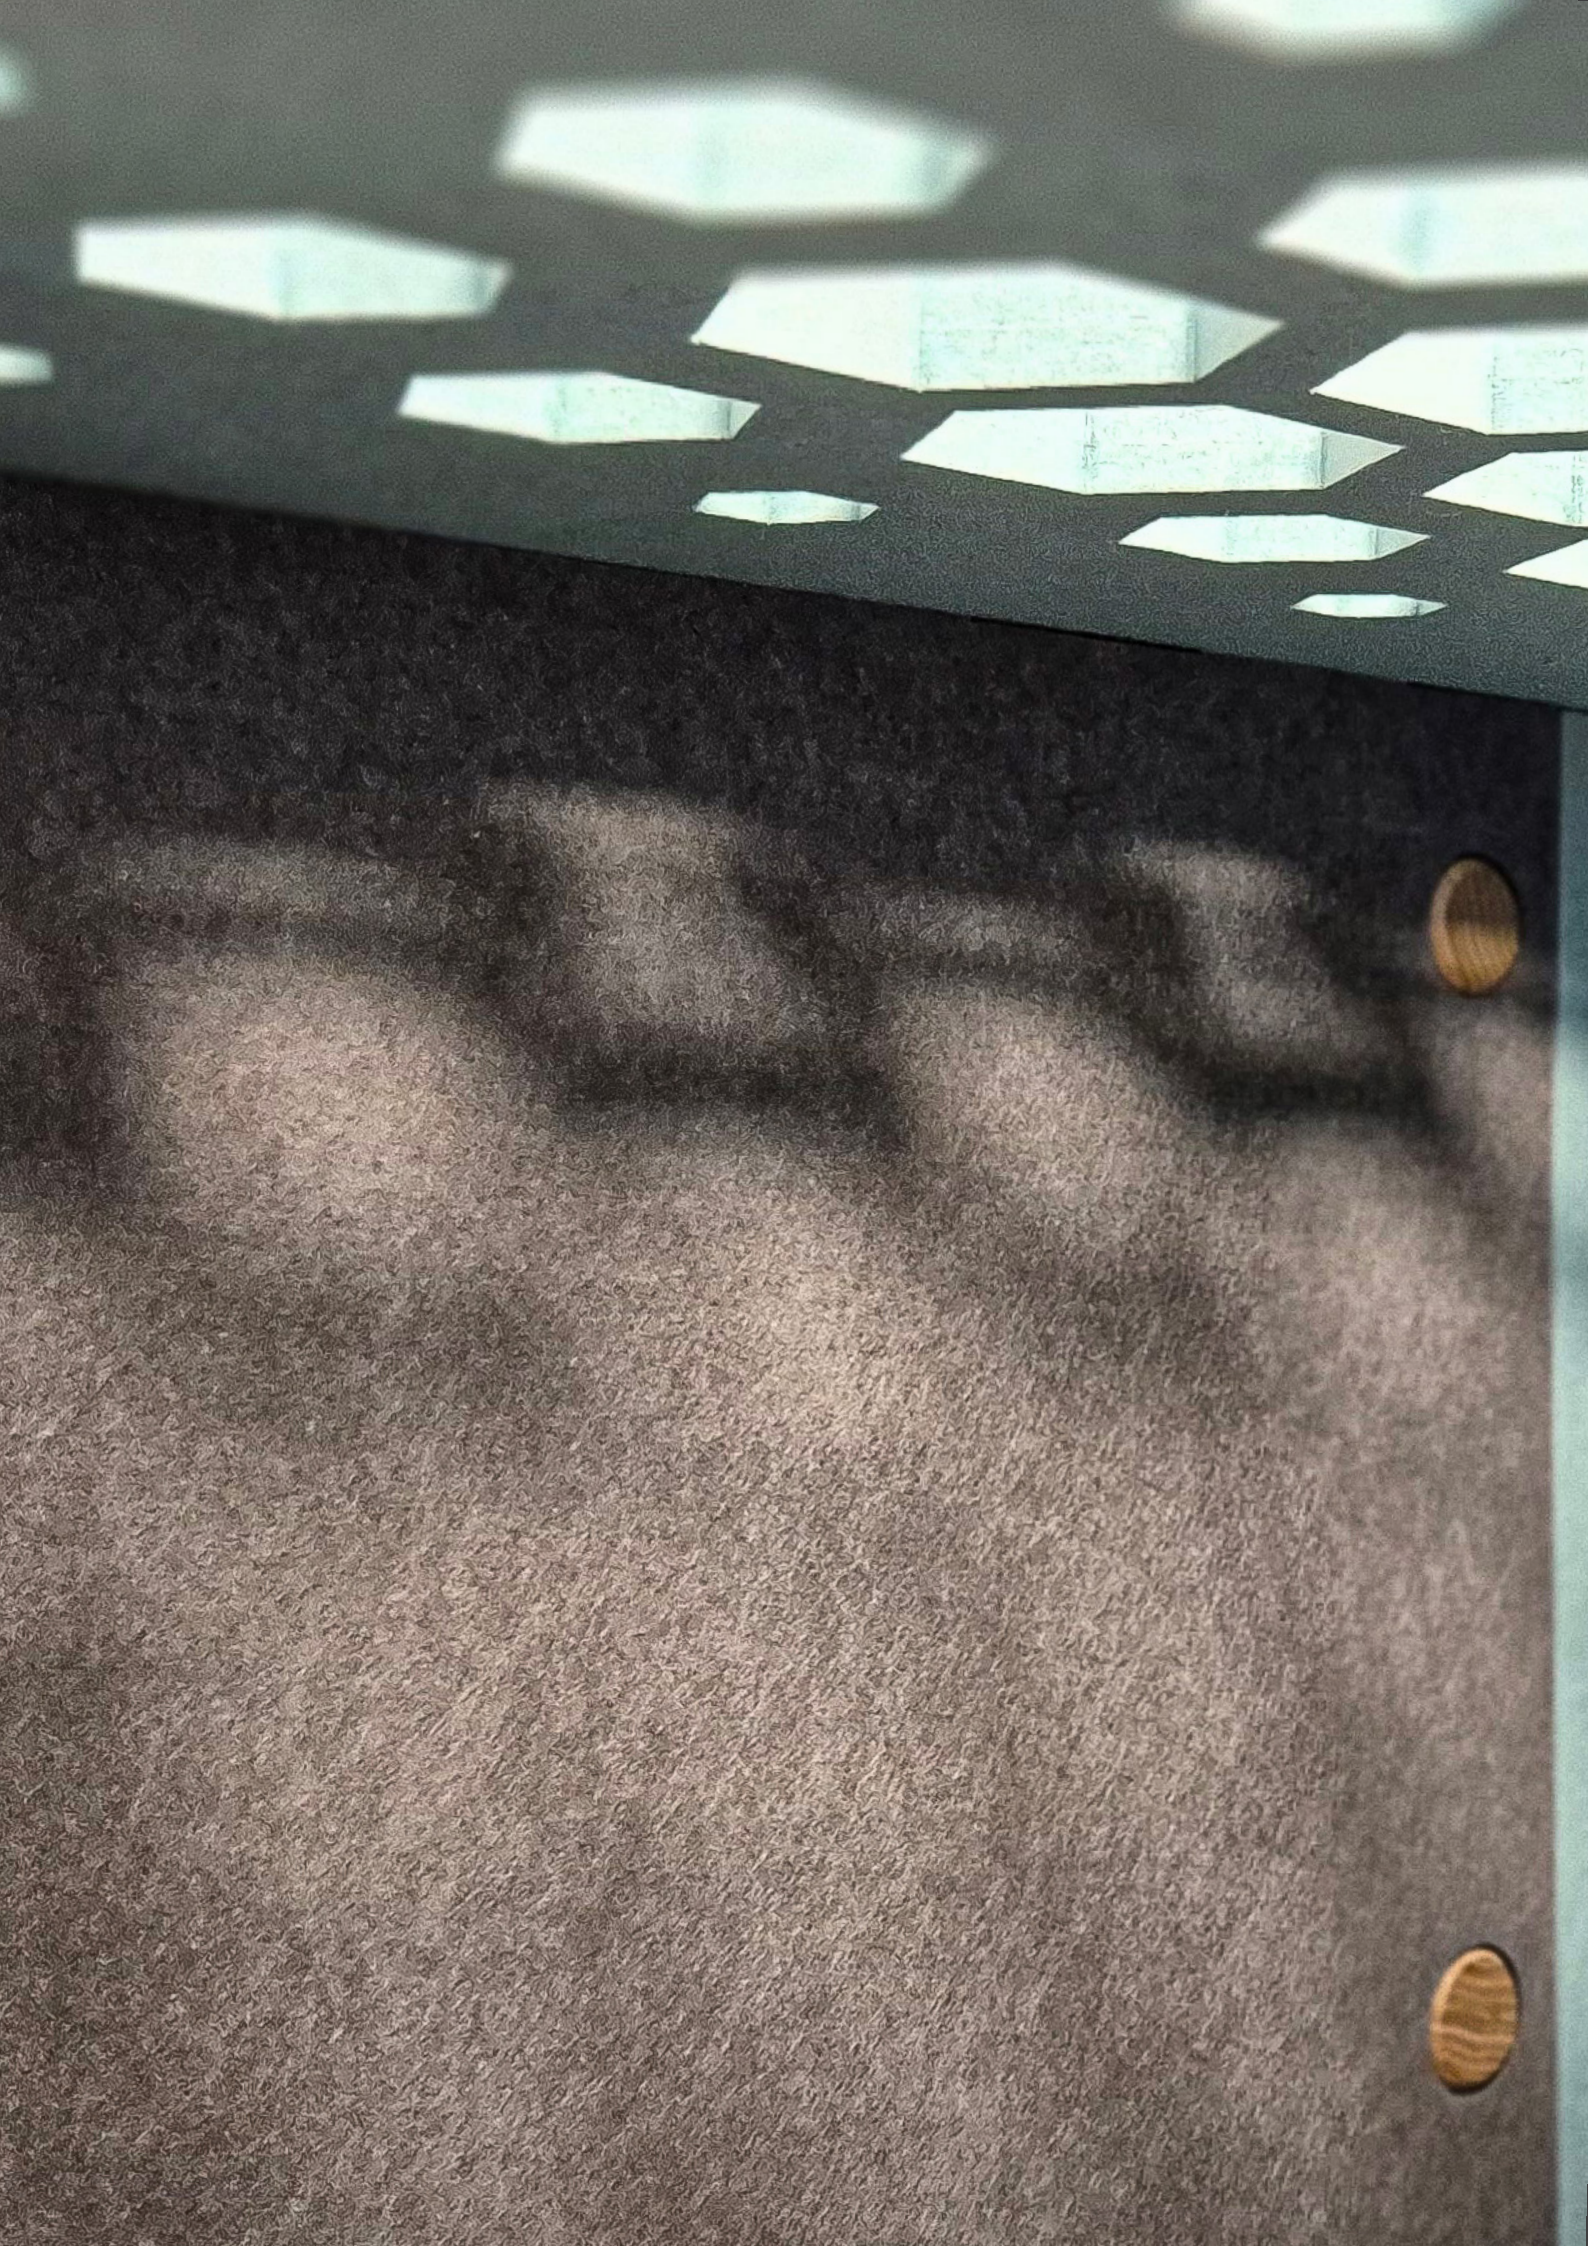

Emphasized Details

The precise integration of wooden accents into PET felt panels creates a unique harmony of materials.

The natural texture of the wood adds warmth and a tactile contrast to the soft texture of the felt, elevating the overall aesthetic.

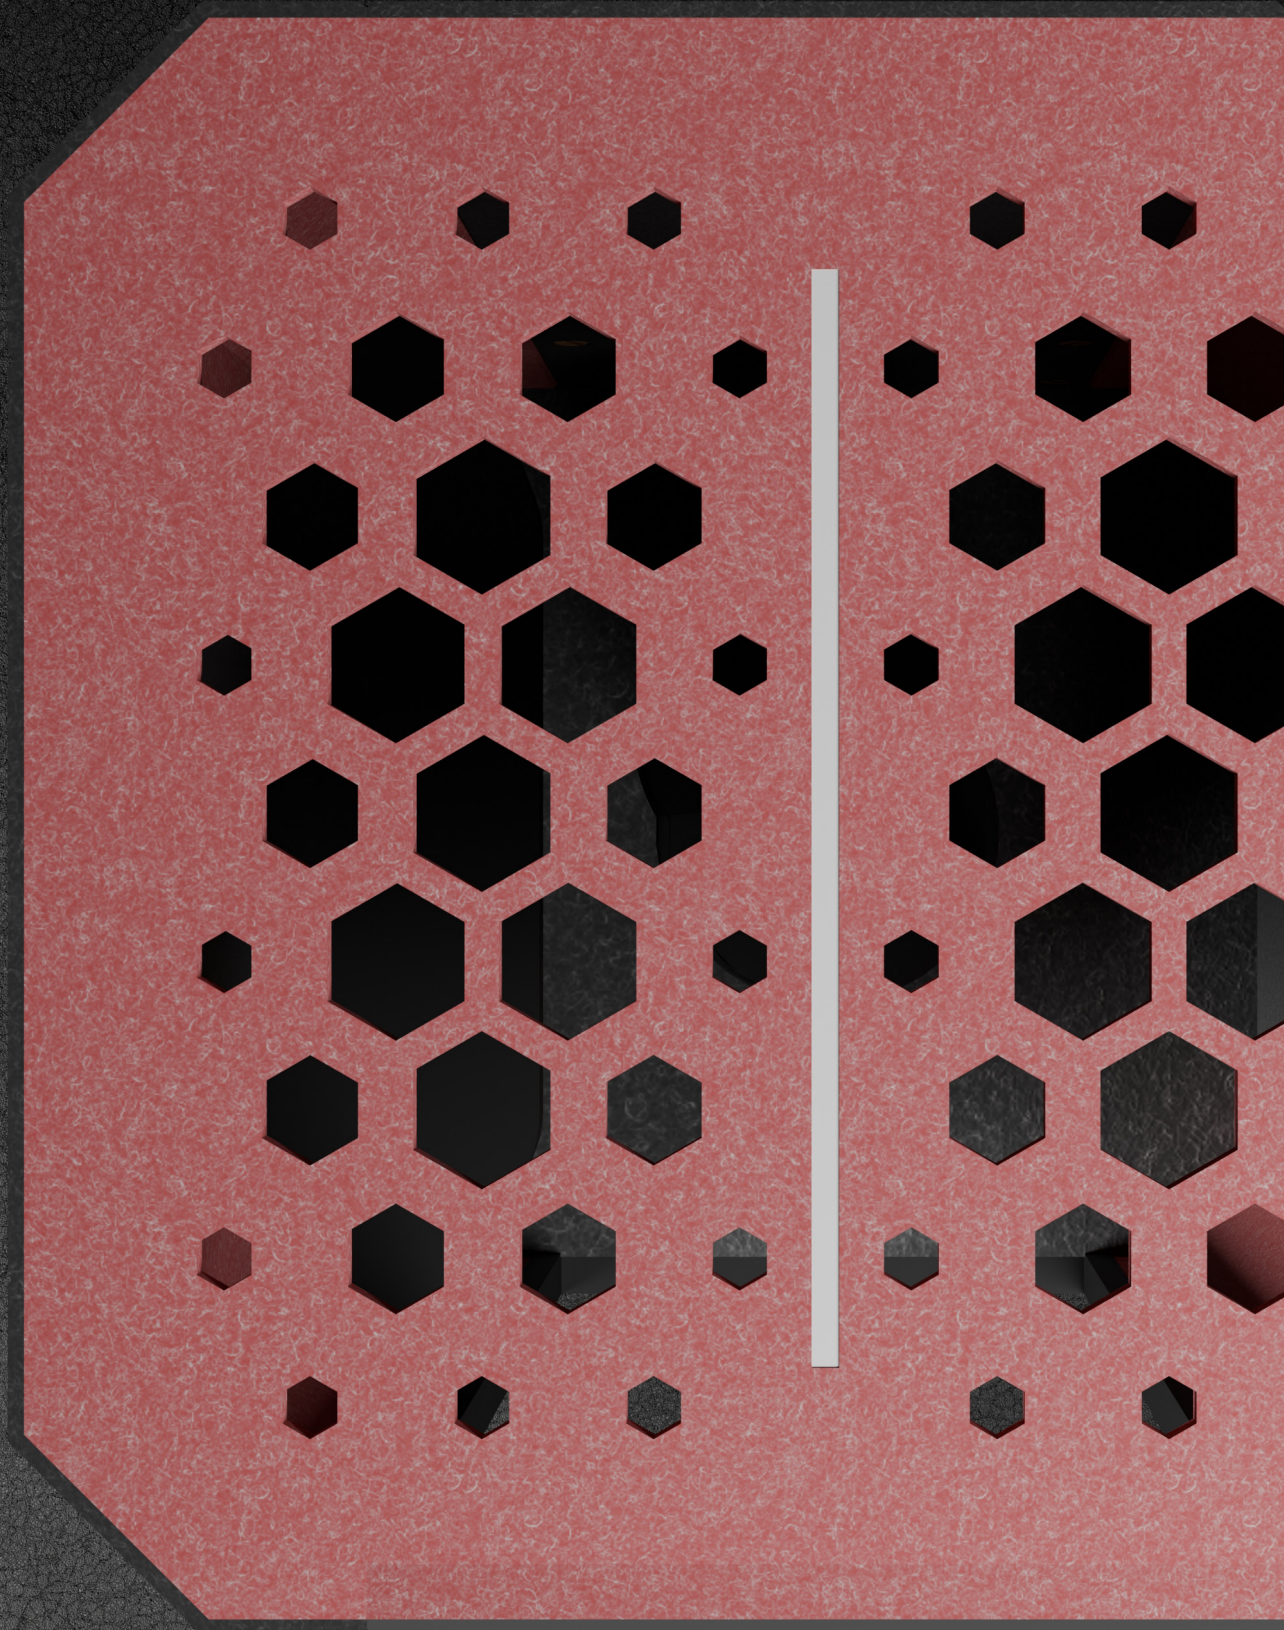

This thoughtful combination of materials reflects a commitment to quality and craftsmanship, creating a harmonious blend of natural and sustainable materials.
